Sandman Glass & Gifts - Newsletter - Special Announcement - Autumn Edition I - September 19, 2007

Hello Everyone!

This is one of my favorite times of the year!

How magnificent mother nature is. She gives us a peak of the beautiful colors of autumn! She teases us with the colors of yellow, orange, red, and purple, right before she sprinkles us with a blanket of pure white driven snow.

My favorite colors to cut glass in autumn are pictured on

this page. The Marigold Delight tray you see above has all the essence of fall colors.

This beautiful Ruby Red Wonder bowl is one of my newest creations to celebrate the harvest season. it is

made with ruby red transparent glass, rich orange & red opaques as well as white and a variety of greens.

I also wanted you to see this spectacular transparent grape bowl which has bright orange flowers on it. It just came out of the kiln this evening.

Boo! Halloween is almost Here!

About the Web Site

Since this is my first official newsletter since 2005, I thought I would let you know how the Web Site works. If you go online to www.sandmanglass.com you will find the web site has been changed and upgraded.

With the help of my Web Master, Jim Bissette, of Generations Photo, we have created a more user friendly site. Of course there is always room for improvement, and I for one, am continually learning about how to design it better. Bottom line...*your suggestions are greatly appreciated!*

Special Announcement
